

HUNG CHING MAN, TWINKY

Product Analyst | Data-Driven Product Development

Tokyo, Japan | +852 5989 7852 | hungchingmantwinky@gmail.com | linkedin.com/in/twinky-hung | github.com/HungChingMan

Visa Status: Engineer/Specialist in Humanities Visa (no sponsorship required)

SUMMARY

Product-minded analyst with 3+ years of experience translating ambiguous business needs into analytics products and digital solutions across Hong Kong and Japan. Recently expanded into full-stack development through an intensive software development bootcamp, shipping two AI-powered web apps end-to-end, from problem definition to deployment. Seeking a data-driven Product role where I can bring together my consulting and analytics experience, technical fluency in Python, SQL, and BI, and multilingual capabilities in English, Japanese, and Chinese to bridge product, data, and engineering.

SKILLS

Languages	Cantonese and Mandarin (Native) · English (Fluent) · Japanese (Proficient, JLPT N2)
Product & Delivery	Requirements Gathering · Stakeholder Management · Cross-functional Collaboration · Project Management · Agile/Scrum · Prioritization · Rapid Prototyping · UAT · User Training · Figma · Jira
Programming	SQL · Python · Ruby on Rails · JavaScript · Stimulus.js · HTML · CSS · Bootstrap · R · VBA · SAS
Data	Tableau · Power BI · Alteryx · BigQuery · Google Analytics · Databricks · Azure Data Factory · dbt · Looker
Technical Build	REST APIs · OpenAI API · LLM Integration · Postman · Git/GitHub · Heroku
Certificates	Meta Certified Marketing Science Professional · Certificate for Business Analytics and Web Scraping · Google Analytics for Beginners · Certified Six Sigma Green Belt · Azure AI Fundamentals

WORK EXPERIENCE

Analyst, Data & Analytics — WeLab Bank, Hong Kong Mar – May 2026

- Partnered with product and operations stakeholders across wealth management, deposit, and lending to define KPIs for a newly launched stock-trading product, then built the KPI and intraday monitoring dashboards that became the go-to source for launch performance decisions
- Triaged and resolved data and reporting issues end-to-end (dbt, BigQuery, Looker), keeping stakeholder reporting accurate and trusted

Data Analyst — Publicis Groupe, Tokyo, Japan May 2024 – Apr 2025

- Partnered with global teams on Pfizer Japan's omnichannel transformation, turning siloed healthcare data into analytics products and media strategy insights
- Led end-to-end development of a pharmaceutical product insights dashboard, translating stakeholder requirements into a scalable self-service data product integrating 10+ datasets and resolving 10,000+ mapping inconsistencies
- Drove cross-functional delivery by gathering requirements, prioritizing enhancements, managing timelines and dependencies, and delivering Japanese user training and documentation
- Designed an HCP Media Tracker that transformed fragmented recurring analytics requests into a reusable self-service product for standardized campaign measurement
- Analyzed engagement and sales data to identify channel opportunities, recommending a media mix shift that cut spend 30% while increasing reach 12%

WORK EXPERIENCE (CONTINUED)

Digital Consulting Analyst — Deloitte, Hong Kong

Feb 2023 – Apr 2024

- Gathered business requirements and translated them into data models, dashboards, and ETL pipelines for a Data Warehouse and BI solution for major HK real estate clients
- Led business and technical teams through end-to-end delivery from requirements to testing to rollout, coordinating priorities and dependencies across both sides
- Supported implementation of a mobile and CRM loyalty program by conducting UAT, issue resolution and user training to improve product quality and support successful rollout

Data Analyst Intern — BASF, Hong Kong

Sep 2021 – Jan 2022

- Translated business-user needs into analytics and automation solutions, delivering 7+ financial dashboards that reduced manual reporting effort by 60%; optimization and data-model enhancements improved dashboard response time by 80%
- Collaborated with global stakeholders to redesign a sales reporting product, consolidating user feedback and supporting rollout and training that achieved 90% adoption

Earlier Experience — Hong Kong

Jan – Aug 2021

- **Tricor, IT Strategy & FinTech BA Intern:** built an eKYC/AML monitoring dashboard, cutting onboarding time 30%; also coordinated regional technology-risk audit initiative
- **RSM, Technology & Management Consulting Intern:** automated internal processes via RPA/Alteryx, improving efficiency 20%; documented 10+ workflows for an ERP implementation

PROJECTS

MoodWalk — Product Lead & Full Stack Developer

3-person team, 1.5 weeks

- Led product design and full-stack build of a mood-based walking-route generation app — from ideation, user research and feature scoping through shipped MVP
- Tech Stack: Ruby on Rails · PostgreSQL/PostGIS · Stimulus.js · Bootstrap · Mapbox · Google Places · OpenAI
- moodwalk-ec6251edd332.herokuapp.com

PeraFlash — Full Stack Developer

3-person team, 1 week

- AI-powered language-learning app turning AI-chat grammar corrections into exportable Anki flashcards
- Tech Stack: Ruby on Rails · PostgreSQL · Stimulus.js · Bootstrap · OpenAI
- pera-flash-3683e7b80a56.herokuapp.com

EDUCATION

AI Software Development Bootcamp — Le Wagon, Tokyo, Japan

Jul – Sep 2026

- 9-week full-time intensive coding bootcamp: Ruby on Rails, JavaScript ES6, Stimulus, HTML, CSS, Bootstrap, SQL, Git, GitHub, deployment, and AI application development

BEng, Systems Engineering and Management (Data Analytics Stream) — City University of Hong Kong

2018 – 2023

- First Class Honours — CGPA: 3.52/4.3, Dean's List
- Exchange: Kyushu University, Fukuoka, Japan — School of Interdisciplinary Science and Innovation, Design Thinking (Oct 2022 – Feb 2023); NTU, Singapore — HCI, AI & Data Mining (Jul 2022)
- Final Year Project: Process Analysis and Improvement for a Company by Integration of Digital Technologies
